ABOUT US

We are people who get away from the stress of the city and surrender themselves in nature whether with weekly holidays or weekend getaways. We are the ones who want to experience the whole reality of wildlife in nature without sacrificing the comfort we are used to.

Starting from our own route, when we woke up in the morning, we wanted to open our door to nature and **Camppass** was born with this dream.

We proudly realized the Camppass project, which is the product of the dreams of us, whose compass always points to nature, strengthened in 2020.

The fact that our creative team consists of sailors and campers became a reference for us while we were projecting our ideas in search of this kind of comfort.

In this context; We started our project with the goals of being rational, powerful, functional and compact.

It is a “Kes Air” Conditioning company

You wake up one morning, you're on a journey.
There is no rush, no stress, no honks, no hassles, no races
and titles at your destination...

This is a return journey towards yourself.
A journey to where you belong.

You feel in your whole soul that you are a part of the
universe and nature and you are safe, in the comfort of
your home, but you are in nature.

You define the landscape of your home every day...

Here we set off from this dream and **Camppass** was born.

Our aim is to be able to live and live a camping life in
comfortable and safe caravans
in nature for four seasons...
